## EFFECT OF HIGHER MONEY MARKET.

Statement of the Associated Banks of New York.

INTERIOR DEMAND.

WALL STREET ACTIVE AND IR-REGULAR.

Trading, as a Rule, Was Comparatively Light-Lead and Silver Quiet-Exports and Imports-Live Stock Markets Fairly Active-Wool Quiet-General Glimpses.

NEW YORK, Sept. 21.-The New York Financier says: The statement of the associated banks of New York City for the week ending September 21 reflects in part the effect of the higher money market abroad and to the interior. The unusually large decrease in loans-\$5,458,000-coming after a continued expansion which had increased that item from \$506,178,000 on July 27 to \$522,698,900 on September 16, can be accounted for on the theory that loans made at the prevailing low rates during that period have been called. Whether the falling excess reserve, bringing with it higher money rates, will still further contract the foun account is a problem. The rate for loans during the week ranged around 2 per cent. The situation favors a higher money market. The demand from the interior continues. The decrease in the holdings of gold reflect deposits made with the subtreasury or withdrawals from the banks for that purpose, and the heavy loss in legal tender is belated evidence of the loss sustained during the previous week, when the heavy movement of gold was

when the heavy movement of gold was bit its height.

The decrease of \$12,291,000 in denosits has not been equalled this year, although in the six days between January 25 and February 2 the loss exceeded \$12,000,000. That, too, was at a time gold was going to Europe.

WALL STREET.

NEW YORK, Sept. 21.-The stock market opened active and irregular with but slight changes in prices. The speculation is assuming a decided tone and in comparatively light trading, advances were scored extending to 1% in Chicago Gas. 1% in Southern preferred and Sugar 1%, in St. Paul I per cent. and I per cent each in Tennessee Coal. Missouri Pacific and Cordage. To-bacco opened 1% lower at 98% rallied to 100% and receded to 98% at the close. The advance in the general market was stemmed for a brief interval around 10:30 and then prices again moved upward. In the late trading there was an easing off of the top figures in part due to the final raid on Tobacco. The market closed generally firm and as a result of the day's operations final prices showed fractional gains generally and an appreciation of 1% per cent in Chicago Gas.

In the bond market firmness prevailed on a moderate volume of business. The sales were \$930,000.

Money on call 1½ per cent; last loan, 1½ closed 1½ per cent.

NEW YORK GENERAL. slon of the sugar trade of the HawniiWOOL—Steady; domestic fleece, 186
WOOL—Steady; domestic fleece, 186
WOOL—Steady; domestic fleece, 186 York. He says that until the present year all the goods invoiced at his office at Honoiulu were consigned to San Francisco, but that during the first six Francisco, but that during the first six months of this year \$1,122,231 worth of the \$4,940,916 worth of sugar exported to the United States was sent direct to New York via Cape Horn. All the New York consignments were made to the American Sugar Refining company. In consequence of this diversion of trade from San Francisco, says Mr. Mills, the number of vessels teaving Honolulu in ballast shows an increase over the corresponding periods of Honolulu in ballast shows an increase over the corresponding periods of 1894, the number for the present year being twenty-two as against eight last year. The vessels leaving Honolulu in ballast are mostly ships which have taken lumber to the islands from Puget sound or coal there from New South Wales. Mr. Mills says that the mesters of many of the vessels from South Water. Mr. Mills says that the masters of many of the vessels from the latter country threaten to discontinue calling at Honolulu because it is no longer profitable to stop there.

4 the entire work including construction and machinery will be furnished by L. C. Trent & Co. Mr. Clark has just awarded the contract and the order for the machinery is to be filled without delay. This is one of the heaviest mining electrical Jobs of the west.

When he was in the city the other When he was in the city the other day, Mr. Clark stated that he had made up his mind to equip the United Verdi mines with electricity throughout and he then asked for bids on the necessary machinery. The contract includes the furnishing of a full complement of electrical apparatus, both lighting and power, including electri-cal locomotives and hoists for the

ORE IS COMING IN.

Another Change For the Better in the Ningara Tunnel.

Still another change for the better has just taken place in the Niagara tunnel, and the outlook for the future of the great improvement is brighter than ever before. Small stringers of ore are coming in at the face and while the values contained therein are low, still there is every indication of the near presence of a large ore body, evidently the vein for which the tunnel has been driven since its com-mencement. Secretary Montgomery has just returned from the properties of the company, and while at the tunnel he made a measurement of its length, finding that the face is some distance beyond the 2,700-foot mark. The ore that is coming in is white quartz, carrying a considerable quantity of iron and some silver and lead. It is not known just at this time whether or not any drifting will take place from the tunnel, but more than likely the management. likely the management will order a continuation of the tunnel for some distance ahead before any other ex-

plorations are made.
Since the close down of the Span-tsh mill, the lessees of the property have been engaged in taking out ore for shipment to the valley smelters, and now they have quite a quantity on hand. It is anticipated that a movement of the product will take place within the next few days. The mill will

MAKING SOME MORE TESTS.

Captain De Lamar May Use the Pelatan-Cieriei Process in a Mill on the Golden Gate. Since his acquisition of the Golden

Gate properties in the Camp Floyd district, Captain DeLamar has made many tests of the high grade arsenical ore found in them in such abundance for the purpose of determining the proper process of treatment. Considerable quantities of the ore have been sent to the mill at DeLamar, while other shipments have gone to Idaho, New York, Denver and Chicago. To date no decision has been reached as to the best treatment for the ores, but the indications are that the captain will select the Delatina Cherica present The Santa Fe route has named the very low rate of \$20 from Denver, Colorado Springs and Pueblo, to Dallas and return, for this occasion—less than one fare for the round trip. Correspondingly low rates will doubtless be made from Utah points. Call at this office for full particulars.

THE

GEO, E. GILMAN, Gen'l. Agt. Pass, Dept. No. 50 West Second South street, Salt Lake City, Utah.

FIGHT!

The Santa Fe route has in dideations are that the captain will select the Pelatan-Clerici process, a combination of leaching by cyanide and precipitation by electricity. Tests of the Golden Gate ore are now being made with the process at Denver and it is not at all unlikely that a plant will speedly be erected for the treatment for the ores, but the indications are that the captain will select the Pelatan-Clerici process. a combination of leaching by cyanide and precipitation by electricity frest are only being the indications are that the captain will select the Pelatan-Clerici process. a combination of leaching by cyanide and precipitation by electricity that a plant will speedly be received for the treatment for the ores, but the indications are that the captain will select the Pelatan-Clerici process. a combination of leaching by cyanide and precipitation by electricity frest to the indications are that the captain will select the Pelatan-Clerici process. a combination of leaching by cyanide and precipitation by electricity frest to the visit speedly be combination of leaching by cyanide and precipitation by electricity frest to the visit speedly be combination of leaching by cyanide and precipitation by electricity feat or are now being made with the process at Denver and the visit speedly between the process and process the process than or the visit speedly between the process.

by electricity from the ore direct has interested scientists for a number of years. For several months a party of French mineralogists has been experimenting with such a process in this city and with such success as to lead to its adoption in mills for practical speration.

The Pelatan-Clerici process, as it is med after the inventors, is a compotassium and precipitation by an electrical current. The ore being first crushed to exceeding fineness is placed in a leaching vat of wood or masonry. The bottom of the vat is a copper piate which is connected with the negative pole of a dynamo. Through the center of the vat runs a shaft from which radigates arms that serves to be which radiates arms that serve to keep the contents stirred up as the shaft revolves. To this shaft is connected the positive pole of the dynamo. The

SECURED THE CONTRACT

In the usual way.

It is claimed for the new process that it works a saving of time, requires fewer varis and consequently a smaller plant and is less expensive than the old cyanide treatment. At the laboratory of the company, 1330 Wynkoop street, a one-ton plant has been in operation for several months and many tests have been made on Colorado ores. On Glipin county sulphides the inventors claim to have saved 80, per cent. Captain J. R. Le Lamar has been won to the process and a plant to handle fifty tons a day is now being built at De Lamar, Idaho, to begin operations inside of three weeks. The contract is for a mill of 150 cons capacity and the enlargement is to be made early next spring. Tests were being made yesterday on ores from De Lamar's mines at Mercur, Utah, and on Cripple Creek ores. If they are successful the process is to take the place of chlorination in the mill at Lawrence, Colo., and be employed in a new plant to be built in Utah. An 87 per cent saving is claimed out of the Idaho ores for which the first plant is being erected. In that mill stamps and pan amalgamic and seven water as a wing to claim to have saved 80, per cent. Captain J. R. Le Lamar has been won to the process and a plant to handle fifty tons a day is now being built at De Lamar, Idaho, to begin operations inside of three weeks. The contract is for a mill of 150 cons capacity and the enlargement is to be made early next spring. Tests were being made yesterday on ores from De Lamar's mines at Mercur, Utah, and on Cripple Creek ores. If they are successful the process is to take the place of chlorination in the mill at Lawrence, Colo., and be employed in a new plant to be built in Utah. An 87 per cent saving is claimed out of the Idaho ores for which the first plant is being supplanted by the new process. Process Which He May Adopt- mation is being supplanted by the new

General Mining News.

Salt Lake engineers have just captured another heavy contract for outside mining properties. This time it is for the equipment of the United Verdi copper properties in Arizona, owned by Hon. W. A. Clark, of Butte, with an electric haulage and lighting plant and the entire work including construction and machinery will be furnished by

NEW FURNACE GOING IN.

Germania and Hanauer Will Probably Increase Their Work This

By tomorrow the new smelter at the Germania should be in commission. It has been completed for some time past and yesterday Mr. Jones gave orders to have it dried out and prepared for work on ore. It requires some little time to prepare one of these furnaces, and in consequence it is hardly probable that full operation will be on before tomorrow. The new roasters at this plant have been working for a considerable length of time.

It is anticipated that the storm will increase the flow of Big Cottonwood so materially that the Hanauer will be enabled to operate more than two has been completed for some time past

enabled to operate more than two stacks as at present. Now that the entire country has received such a soaking it is not probable that any more irrigation streams will be needed. and this being the case the creek should return to its normal condition and the power wheels at the smelters be enabled to furnish sufficient motive power for the operation of three or more furnaces. With the coming of additional power a third stack is to be blown in at the Hanauer.

blown in at the Hanauer.

At present there are but seven stacks in blast at the smelters in the valley. One of the reasons—the chief reason—for this small number is the lack of ore receipts. There are now so many properties of the territory which are sending their products outside for treatment that the supplies of the smelters south of this city are cut down very materially.

ORDERED SOME WORK DONE.

Siskiyou Properties of the Nebraska Mining Company to Be Developed Messrs, Dern and Heimrich, of the

Nebraska Gold Mining and Milling company, returned yesterday morning from California, where they went for the purpose of inspecting the properties the purpose of inspecting the properties of the company in Siskiyou county, in arder that they might decide upon the work necessary for the development of the ore bodies. This group of mines was purchased by the five principal owners of the Mercur for \$50,000, but to date no very extensive work has been done on it. Several shipments of ore were made to this city and the tests that followed in a Crawford miling ave good returns in gold.

The gentlemen did not remain long at the mines, only long enough to make an inspection of the properties of the construction cound be rushed about to construction cound be rushed about to carrive the construction cound be rushed about to carrive the construction cound be rushed about a principal abead. As it is, there will be some delay. This system is to convey the waters of the group of lakes back of Bonanza flat to the properties named.

Snow in Them All.

Snow fell in all of the mining camps of the territory during Friday night and yesterday. Our at Bingham there was a fall of fifteen inches, and operations could be some delay. This system is to convey the waters of the group of lakes back of Bonanza flat to the properties named.

Snow in Them All.

Snow fell in all of the mining camps of the territory during Friday night and yesterday. Our at Bingham there was a fall of fifteen inches, and operations on the upper tramway were suspended for a considerable length of time.

make an inspection of the properties and decide where the work about to commence is to be applied. Orders were left with the foreman in charge to put a force of workmen at work on the development, and it is anticipated quite a showing will be made this win-

GEYSER WILL BE OPERATED.

Superintendent Stunrt Has Arranged For the Working of the Prop-

made, the Geyser mines and mill will be operated, after all, before the completion of the Gold Belt Water complete the Go pletion of the Gold Belt Water company's system. The work will be in charge of Superintendent Stuart, who came in from the camp Friday night for the purpose of consulting with Mr. Gisborn on matters relative to the properties. As a result of that meeting Mr. Stuart was authorized to go out to the camp and resume operations in both the mines and mill. It is pro-posed to take care of the outstanding time checks and bank checks at

Glen R. Bothwell, one of the owners of the Geyser and a holder of the lease and bond on the Hecla, will go out to the Mercur on Monday for the pur-pose of personally placing the new boiler which is to furnish steam for the operation of the pump on the Hec-la shaft. The water raised will be sent down to the Geyser mill in order that the operation of the latter may be made possible. of the Geyser and a holder of the least

It Was Only a Fake.

The statement made by a morning contemporary in its issue yesterday morning to the effect that Hon. Allen G. Campbell and Hon. Robert C. Lund had secured control of the Elizabeth Consolidated Mining and Milling company, through the transfer to them of 100,000 shares of the stock, was endinged. Consolidated Mining and Milling company, through the transfer to them of 100,000 shares of the stock, was entirely untrue. No such deal has been made, nor is it likely to ever be made. A proposition was made to Mr. Campbell by the Elizabeth company people, and Mr. Lund inspected the properties, but nothing came of the matter. Mr. Campbell stated yesterday that the story was without foundation as he Campbell stated yesterday that the story was without foundation, as he did not even think of taking any of the stock of the company. In view of the fact that a certain gentleman connected with the company in a legal way has repeatedly endeavored to dispose of a block of the stock for something in the neighborhood of 3½ cents per share, the whole affair looks like a stock fobbing scheme.

AUCTION: AUCTION: The supply of water at the mill being insufficient for a test run, the ma-chinery at the Sunshine plant was not turned over on Friday last as at first anticipated would be the case, the test anticipated would be the case, the test being continued until last evening, when an ample amount of the neces-sary water was on hand. Judge Sher-man came in from the properties last evening. He stated that everything was in shape for the trial run of the mill when he left.

the positive pole of the dynamo. The copper plates in the bottom of the var are covered with mercury, the crushed ore put in with water to hold it in solution and the usual quantity of cyanide. As the cyanide does its work the shaft revolves and the freed metals are deposited upon the amalgam in the bottom.

In from eight to ten hours the process does its work so that the ore solution is ready to be drawn off and after that is done a second vent is opened and the

very desirable one. The gentleman will go out to the Park this morning.

Alice Bullion Received Another shipment of Alice silver bars was received yesterday by Walker Bros. Banking company. It consisted of seventeen bars, valued at \$17,600. The reports which accompanied the consignment conveyed the information

Framing All in Place.

General Manager Daly, of the Daly-West, has returned from the Park. He West, has returned from the Park. He reports that the framing for the concentrator building is now all in place and it will not be long before the closing in is accomplished. The receipt of machinery is not anticipated within a month, as it is a special order and will require time in filling. It will be well along toward the new year before the plant is ready for operation.

Pushing the Construction.

James W. Nelll, who proposes to nounced later. put in a new process for the prelimimany treatment of the low-grade ores of Bingham, is rushing the construc-tion of the works ahead at a good rate. He yesterday received advices to the effect that the engine and crusher effect that the engine and crusher would be shipped from Chicago within the next few days, and the machine that will take care of the ores is being made in Denver. Out at Bingham the necessary buildings and ore bins are being constructed. Mr. Neill has leased several properties in the Old Reliable and will operate them in connection with the new plant. He are nection with the new plant. He pects to revolutionize old methods,

Completed the Trench.

The trench for the Ontario-Daly water system has now been completed and bur for the fallure of the pumping to arrive the construction could be rushed ahead. As it is, there will be some delay. This system is to convey the waters of the group of lakes back of Bonanza flat to the properties

Reduced the Force.

The working force of the Live Yankee, in American Fork canyon, owned by Messrs, Campbell and Hol-den, has just been cut in two, and the shipments of ore from the property are not heavy. It is not at all unlikely that operations at the property will be entirely suspended within the next few weeks on account of the weather.

Smelter shipments on lead were yes-New arrangements having been terday made on a basis of \$3.15 for the

NEWS FROM NEARBY

LY HANDLES PROF. DAVIS.

Cases-Housebreakers Sentenced-General Glimpses. PROVO, Sept. 21.-Prof. Davis, of the R. Y. neademy, was handled very roughly last evening by Will Knight. It appears that Peof Davis struck

(very lightly) one of Knight's sisters while she was attending one of the overflow. The committee is working hard on the matter, and other special features may be expected to be anprofessor's classes. The little girl went home and reported that she had been nome and reported that she had been struck, which incensed Knight and he hunted up the professor and proceeded to give him a thrashing. Prof. Davis face is in a very bad condition as a result of the encounter, and it is stated that he will be had up for a month. Knight was arrested and placed under 350 bonds pending an investigation. investigation.

C. Larson and A. Sorenson were ar-

of not guilty entered to assault to com-

Mrs. James Agler.

It was decided to open a room in the First ward meeting house and the superintendent yesterday made all arrangements for starting school there tomorrow.

A large number of the Krag-Jorgenson rifles have passed through to the west lately, five different batteries on the coast having been supplied with the new pattern.

The train crews on incoming trains from all directions report snow, sleet and cold on all portions of their routes which run through the mountains. Fears of a frost when the clearing up time comes are expressed by farmers.

built light and has true merit, buy a Hambler.

The winnings of the Rambler have not been confined to Utah. You probably have noticed in the daily papers the returns from the meet at Jaint Innetion. Colo., wherein Weller and Thatcher carried off the class B pluma; not this was no small victory, as they rode in competition with Colorado's crack men. There were four prizes, valued at \$155. Our Weller and Thatcher walked off with three of them, vehicle at \$155. Leaving just a smell for their competitors. You ought to be satisfied by this time that the Rambler is the best wheel built. Come and see 'em.

Arrest of Alleged Embezziers-Verdiet Against the Rio Grande Western-A Couple of Attempted

C. Larson and A. Sorenson were ar-rested yesterday and lodged in jail at Richfield. It appears that Larson and Sorenson have been engaged in the commission business in Sait Lake for Malcomb & Hughes, of Spanish Fork, and were doing a thriving business, but an investigation revealed the fact that they were embergines. A Linted but an investigation revealed the fact that they were emberglers. A United States deputy marshal arrested one of them in August and on a plausible story let him go till morning. That is just where the marshal was fooled. The follow skipped out and Mr. Fowler has been in search of him ever since. He traced him to Salt Lake, from there to Sevier county, and telegraphed Marshal Hean to arrest him. Mr. Fowler will go to Richfield this afternoon.

on vs. the Rio Grande Western rail-way company found for the plaintiff in the sum of \$850.
